***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 3-9, 11-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. There is no disclosure for both the pin 48 and the catch being movable or the catch being movable.

The merit to the claims are pending per the response to the 112 first paragraph above.

***Allowable Subject Matter***

3. Claims 15, 17-24 are allowed.

***Response to Arguments***

4. Applicant's arguments filed 10/8/04 have been fully considered but they are not persuasive.

With respect to applicant's argument that the written description requirement "need no described the claimed subject matter in exactly the same terms as used in the in the claim; it must simply indicate to persons skilled in the art that as of the filing date the applicant had invented what is now claimed", examiner respectfully states that although the description does not need to describe "...the subject matter in exactly the same terms...what is now claimed", the description needs to show applicant is in possession of the claimed invention. Applicant has not

demonstrated in the specification that applicant has possession of the invention to the “catch being movable”. As disclosed throughout the specification, the catch is fixed, while the pin is movable. Applicant has not disclosed how the catch is movable either. In re Wright 999 F.2d 1557, 1561, 27 USPQ2d 1510, 1513 (Fed. Cir. 1993), the Federal Circuit has repeatedly held that “the specification must teach those skilled in the art how to make and use the full scope of the claimed invention without “undue experimentation”. The argument is thus moot.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
